

British Society for Skin Care in Immunocompromised Individuals

Date: Tuesday 3rd July
Time: 09:00 – 12:30
Room: Sidlaw
Chairs: Tanya Basu & Conal Perrett
 Catherine Harwood & Helen Ramsay

PROGRAMME		
09:00 – 09:05		Welcome & Introduction by Professor Charlotte Proby
		CLINICAL CASES AND RESEARCH REPORTS
09:05 – 09:10	BI01	579: Disseminated histoplasmosis as a presenting feature in HIV infection
09:10 – 09:17	BI02	398: A comparison of organ transplant recipients who develop cutaneous basal cell versus squamous cell carcinoma
09:17– 09:22	BI03	482: Cutaneous and pulmonary phaeohyphomycosis secondary to <i>Alternaria</i> species in a cardiac transplant recipient
09:22 – 09:29	BI04	98: The Burden of Cutaneous Disease in Solid Organ Transplant Recipients with Skin of Colour
09.29 – 09.34		DISCUSSION TIME
09:34 – 09:41	BI05	208: Clinicians' attitudes to photo protection in IBD patients on immunosuppression
09:41– 09:48	BI06	605: A retrospective clinicopathological review of individuals with co-existing melanoma and chronic lymphocytic leukaemia
09:48 – 09:53	BI07	654: Metastatic squamous eccrine ductal carcinoma in an organ transplant recipient: a diagnostic and management challenge
09:53 – 10.00	BI08	210: The development of a novel educational tool targeted at IBD patients on immunosuppression
10:00 – 10.05		DISCUSSION TIME
10.05 – 10:40	BIGL	Guest Lecture: Dr David Paige Title to be confirmed Guest Speaker Introduced by Dr Tanya Basu
10:40 – 11:10	Break	Exhibition Hall
		CLINICAL CASES AND RESEARCH REPORTS
11:10 – 11:15	BI09	133: Leprosy in Immune Reconstitution Inflammatory Syndrome (IRIS)
11:15 – 11:20	BI10	503: A challenging case of persistent pseudomonas in an immunocompromised patient
11:20 – 11:25	BI11	331: The Perfect Storm - a case of atypical presentation, immunosuppression and antibiotic resistance
11.25 – 11.30	BI12	409: Majocchi's Granulomata in the Transplanted Host
11.30 – 11.35		DISCUSSION TIME
11:35 – 11:40	BI13	184: Fingolimod-induced primary cutaneous CD30(+) anaplastic large-cell T-cell lymphoma
11:40– 11:45	BI14	568: A solitary cutaneous CMV ulcer revealing advanced HIV immunosuppression
11:45– 11:52	BI15	636: Dermatological diagnoses and HIV treatment status: A single centre HIV walk-in clinic experience
11:52 – 12:00	BI16	550: The role of the dermatologist in the haematology ward: our experience in a major haematopoietic stem cell transplant centre
12.00 – 12.05		DISCUSSION TIME
12:05 – 12:30		AGM All BSSCII members most welcome and invited to contribute

POSTERS

BI17	448: Trichodysplasia Spinulosum in Adult Organ Transplant Recipients
BI18	560: X-linked agammaglobulinaemia: a rare cause of a granulomatous skin eruption
BI19	395: Eruptive acral melanocytic naevi following treatment of metastatic germ cell tumour
BI20	574: Medication related osteonecrosis of the jaw; should dermatology patients being started on systemic corticosteroids be advised to have a routine dental examination first?
BI21	49: Doctor, my skin feels like a hedgehog?
BI22	160: Pyoderma Gangrenosum Ulcers Treated with Novel Micropore Particle Technology
BI23	380: Not all granulomas are cutaneous sarcoidosis.
BI24	591: Hydroxycarbamide induced facial ulcers
BI25	73: Ustekinumab treatment of ulcerative colitis associated pyoderma gangrenosum in a patient with adalimumab induced renal failure
BI26	132: Duodenal Villous Atrophy from Mycophenolate in Pemphigus Vulgaris
BI27	514: A rare case of iatrogenic Kaposi's Sarcoma secondary to low dose corticosteroid therapy
BI28	91: Widespread Warts in an Immunosuppressed Host Disguised as a Papulosquamous Eruption
BI29	203: Treatment of psoriasis with Secukinumab (Real-World data) at a tertiary hospital in Wales.
BI30	360: A case of cutaneous Chronic Lymphocytic Leukaemia (CLL) of the Vulva
BI31	427: Unilateral loss of vision in a patient on biological therapy for multisystem sarcoidosis
